Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5,7-14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Idland. Idland discloses a window cover device comprising sheets of material 12-16,112,114, apertures 113, indicia 115, and a backing layer 26.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Idland. As to the specific density of apertures, inasmuch as there is nothing to indicate that the particular number of apertures and their spacing is significant or is anything more than one of numerous spacings one having ordinary skill in the art would have recognized for the explicit purpose of controlling the transparency of the window cover, no patentable weight has been attributed thereto.

3. Claims 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Idland in view of Gonzalez. While Idland does not set forth the use of a container

Art Unit: 3634

for storing the window cover, Gonzalez discloses a window cover which is stored in a container 40, wherein, to incorporate this teaching into the window cover of Idland for the explicit purpose of storing and protecting the window cover when not in use would have been obvious to one of ordinary skill in the art.

4. The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Dunklin et al, Cliffe, Pawlowski, Janssen et al, Hendershot, Masi '773 and '135, Lee.

5. Any inquiry concerning this communication should be directed to David M Purol at telephone number 703/308-2168.
